

E-COOP – DIGITAL COOPERATIVES

cooperate. virtually. everywhere.

4th Newsletter – October 2014

THE THIRD THEMATIC BROCHURE CO-PRODUCING PUBLIC SERVICES

This third thematic brochure is a result of the shared analysis operated by the E-COOP project partners about the evolution of “digital mediation” policies. It focuses on the coproduction of public services through digital cooperation.

E-COOP BEST PRACTICES

An example of E-COOP best practice: the Telecentre of Dymi

Dymi is a rural municipality located 22 km south-west of Patras in Greece. According to the census in 2001 the population totals 10,955 with some 47% of those living in the coastal area. The Municipality of Dymi is keen to improve local development. And has supported initiatives such as the Telecentre.

E-COOP is a project financed by the European Union in the framework of the INTERREG IVC programme. We are working to advance the Union’s Digital Agenda through collecting, analysing and sharing local good practices on digital public services and by developing innovative Digital Public Spaces. We also aim to produce a set of comprehensive Policy Guidelines designed to improve local, national and EU-level decision-making and planning processes. Welcome to the latest newsletter of the project.
